

Elektro Eggers Joins the SCIO Automation Group

The group is expanding their Automation portfolio and strengthening their market position as a full-service provider in the Process Solutions business segment

Frankenthal (Germany), March 21st, 2025 – **Elektro Eggers GmbH, a specialist in automation based in Grasberg (Niedersachsen, Germany), has joined SCIO Automation, an international industrial automation group. This acquisition expands SCIO Automation’s service portfolio within the Process Solutions business segment and strengthens its market position as a comprehensive solutions provider. Elektro Eggers specializes in programming services and electrical assembly.**

Elektro Eggers is a mid-sized automation specialist that brings expertise in PLC programming, process control technology, hardware design, engineering services, as well as electrical assembly and installation to the SCIO Automation Group. Headquartered in Grasberg (GER), the company will be integrated into the SCIO Automation Group as a subsidiary of VESCON Process GmbH, and will continue to operate under the Elektro Eggers brand within the Process Solutions business segment. In addition to Elektro Egger’s extensive expertise, its acquisition grants SCIO Automation further access to attractive customer segments in industries such as water treatment, food and pet food production, and pharmaceuticals.

Michael Goepfarth, CEO of the SCIO Automation Group, emphasized this point: *“By acquiring Elektro Eggers, we are expanding our portfolio to include essential and highly specialized engineering and assembly services. This enables us to offer our customers in the Process Solutions business segment fully integrated automation solutions from a single source, significantly strengthening our market position. Elektro Eggers not only brings technological expertise, they can also draw on years of experience and a dedicated team. We look forward to working together and exploring opportunities for growth.”*

A strong partner in process automation

Alongside VESCON Process (based in Frankenthal, Germany) and Elektro Eggers, the Process Solutions business segment also includes VESCON AQUA GmbH (based in Flensburg, Germany). By combining the expertise of these three companies, SCIO Automation is now able to position itself as a strong partner in process automation and process engineering for a wide range of industries. The Process Solutions business segment specializes in process technology plants and offers decades of experience and unparalleled know-how to customers in the chemical, pharmaceutical, life sciences, and food industries. The service portfolio not only includes process automation and process engineering, it also extends to M&A planning, expediting, pipeline technology with stress analysis and recurring inspections, as well as GMP consulting, engineering, and FoodTec solutions.

development and future prospects of the Process Solutions business segment

The Process Solutions business segment at the SCIO Automation Group has seen some exciting developments in recent years. Not least the acquisition of VESCON AQUA in 2020 and strategic decision taken to create teams of experts, including those for FoodTec and process automation in 2024, have diversified the portfolio and customer base. By integrating Elektro Eggers into this existing ecosystem, the portfolio has now been expanded to include essential services in PLC programming and control panel construction, thus enabling the business segment to position itself as a full-service provider in the near future.

Stefan Ruthmann, Managing Director of VESCON Process and Head of the Process Solutions business segment, stated: *"We are very pleased that Elektro Eggers, with its automation and control panel expertise, is now part of our business segment. This will open up many new project opportunities for us in the near future. What's more, we can now ensure that VESCON AQUA and Elektro Eggers are able to work together even more closely, as both companies have already successfully completed joint projects in the past."*

Hartmut Thoden, Managing Director of Elektro Eggers, added: *"Becoming part of the SCIO Automation Group presents us with lots of new market opportunities and synergies that will drive our company forward. Our existing business relationships with VESCON AQUA will continue to go from strength to strength, and our customers will stand to benefit from an even broader range of services."*

The existing Elektro Eggers management team, consisting of Hartmut Thoden (Sales) and Michael Grove (Operations & Administration), will be joined by Maik Bösch, already Managing Director of VESCON AQUA, to enable ties to be strengthened even within the Process Solutions business segment.

With its acquisition of Elektro Eggers, the SCIO Automation Group continues its growth trajectory in 2025, further solidifying its position as a leading player within the industry automation sector.

About SCIO Automation Group
